

INNOVATION IN
WORKING ENVIRONMENTS

Kios®

Kios®

Benching System

Kios offers a design with great flexibility to adapt highly functional and independent workstations. This line allows a direct interaction where a continuous collaboration is required.

Its clean structure facilitates freedom of movement thanks to its open bases. These qualities are highlighted with a tray system below the worksurface to hide and distribute power and data wiring.

Its multi-functional beam allows the placement of dividing screens for more privacy. Also, complementary items such as strategically located cabinets and shelves can be added.

Kios can be customized according to your corporate or brand identity allowing you to bring your personal touch.

Tray for Technology Services

Shared Double Shelf

Personal Suspended Storage with Drawer

- ① Multifunctional beam. Attaches to support components such as storage cabinets and privacy screens.
- ② Tray. For routing power cables and accommodate double sided power harnesses and voice and data jacks.
- ③ End support. Structural support that attaches to either end of single or double sided station. Includes glides for leveling.
- ④ Mid end support. Structural support that attaches between two single or double sided stations. Includes glides for leveling.
- ⑤ Floor power entry pole. Power and data cables are routed from the floor to the end of a cable tray. Can be connected on any workstation. Includes glides for leveling.

- ⑥ Ceiling power entry pole. Power and data cables are routed from the ceiling to the end of cable tray. This pole can only be connected at either end of a group of workstations.
- ⑦ Worksurface access door. Allows easy access to power and data underneath the worksurface.
- ⑧ Power harness. 8 wire 4 circuit power harness accommodates 2 duplex receptacles per side per each worksurface access door.
- ⑨ Jack housing. Allows two jacks for voice and data per housing. Two locations available per each worksurface access door.
